

List of Courses in English For Exchange/Study Abroad Student
Faculty: Psychology

No	Faculty	Departement/ Program Study	Degree	Course Title	Course Code	Credit	Contract Hours (Total Minutes per Semester)	Term Offered	Campus	Course Description
1	Psychology	Psychology	Undergraduate	Philosophy and History of Psychology	PSPS601001 (Compulsory Courses)	4		1	Depok	Upon completion of this course, students are able to understand the philosophical assumptions made by some of the most influential people who have shaped psychology. Students will also learn about contemporary psychology theories and practices, including behaviorism, developmental psychology, cognitive psychology, sociobiology, neuropsychology, and cognitive neurobiology.
2	Psychology	Psychology	Undergraduate	Perceptual Motor, Motivation, and Emotion	PSPS601002 (Compulsory Courses)	4		1	Depok	Students who successfully complete this course will be able to use theories and ideas about perceptual motors, motivation, and emotions in daily life at the individual, group, organizational, and community levels from the perspectives of psychology and behavioral neuroscience. The lecture technique will include individual learning as a prerequisite for attending lectures, interactive lectures, learning video screenings, small group discussions, as well as debate and feedback in large groups for a deeper comprehension of the subject matter. All techniques are used synchronously and asynchronously via online media or blended learning. English or Indonesian will be used as the language of instruction for this course. Quiz results, on-the-spot essays, mid-semester exams, final semester exams, final project projects involving the application of the material from this lecture and other courses in the same semester, as well as active participation in small group and large class discussions are all used to determine the cumulative grade of students taking this course.
3	Psychology	Psychology	Undergraduate	Scientific Writing	PSPS601003 (Compulsory Courses)	3		1	Depok	The purpose of this course is to educate students to the fundamentals of psychological scientific writing. Since both individual and group assignments call for scientific writing, it is a crucial part of the undergraduate program at the Faculty of Psychology, University of Indonesia. Peer review, consultation, in-class exercises, and writing assignments are just a few of the learning activities used to meet course objectives. Bahasa Indonesia will be the language of instruction for this course.
4	Psychology	Psychology	Undergraduate	Research Method and Descriptive Statistics	PSPS601004 (Compulsory Courses)	3		1	Depok	Research Method and Descriptive Statistics (MPSD) course unifies research methodology and descriptive statistics into one subject. The standard teaching approach includes interactive lectures, data processing labs, and drafting research reports. contains information on how to do scientific research, including how to formulate a research question, collect data, process that data, and interpret the results, particularly for descriptive psychology research. The introduction and assessment of learning outcomes in this course will be conducted in Bahasa Indonesia.
5	Psychology	Psychology	Undergraduate	Religion	UIGE600004 (Compulsory Courses)	2		1	Depok	University compulsory course
6	Psychology	Psychology	Undergraduate	Academic English	UIGE600003 (Compulsory Courses)	2		1	Depok	University compulsory course
7	Psychology	Psychology	Undergraduate	Developmental Psychology	PSPS602005 (Compulsory Courses)	4		2	Depok	After completing this course, students are equipped to use developmental psychology theory to study many characteristics and phases of human development in the context of individuals, groups, and communities. The lecture style that will be employed includes individual learning as a prerequisite for attending lectures, interactive lectures, watching instructional videos, small-group discussions, and large-group discussion and feedback. All techniques will be used synchronously and asynchronously via online or hybrid learning techniques. English or Indonesian will be used as the language of instruction for this course.
8	Psychology	Psychology	Undergraduate	Learning, Memory, and Thinking	PSPS602006 (Compulsory Courses)	4		2	Depok	After completing this course, students are able to analyze behavior based on learning and cognitive psychology as well as neuropsychology approaches. In this course, students will study: 1) the process of forming behavior based on three major theories, namely Classical Conditioning, Operant Conditioning, and Observational Learning; 2) basic mental functions, which include: attention, memory, thinking, language, and metacognition; and 3) the nervous system that underlies the process of forming human behavior and mental processes. Learning activities will be carried out online with synchronous and asynchronous meetings. Students are required to learn actively and independently while exploring the material provided. Learning evaluation is done through exams (quizzes, UTS, UAS), independent assignments (reflection, essays), and group assignments (research reports). The research report is a task that is carried out in groups where the task is also part of the research report at the MK Research and Inferential Statistics I.

9	Psychology	Psychology	Undergraduate	Methods of Observation and Interview	PSPS602007 (Compulsory Courses)	3		2	Depok	One method of gathering information in the subject of psychology is through observations and interviews. For study, evaluation, and the creation of interventions, data gathered through observation and interviews can be examined. Students must possess theoretical understanding (principles, processes, types, biases, and pitfalls) and be able to use observation and interview procedures in the appropriate area of psychology in order to obtain high-quality data (according to ethics). In this course, students have their first exposure to observing and interviewing populations of children, adolescents, and adults. They also acquire understanding about behavior and interviewing ethics. Students are also given the chance in this course to evaluate, draw conclusions from, and present the findings of observations and interviews in accordance with the standards of psychology. To do this, theoretical information is delivered through lectures and group discussions, and the initial experience of watching and interviewing kids, teens, and adults is offered through role playing and online observation and interviewing exercises.
10	Psychology	Psychology	Undergraduate	Research Method and Descriptive Statistics	PSPS602008 (Compulsory Courses)	3		2	Depok	Research Method and Descriptive Statistics (MPSD) course unifies research methodology and descriptive statistics into one subject. The standard teaching approach includes interactive lectures, data processing labs, and drafting research reports. contains information on how to do scientific research, including how to formulate a research question, collect data, process that data, and interpret the results, particularly for descriptive psychology research. The introduction and assessment of learning outcomes in this course will be conducted in Bahasa Indonesia
11	Psychology	Psychology	Undergraduate	Integrated Character Building	UIGE600006 (Compulsory Courses)	5		2	Depok	university compulsory course
12	Psychology	Psychology	Undergraduate	Personality Theories	PSPS603009 (Compulsory Courses)	4		3	Depok	
13	Psychology	Psychology	Undergraduate	Social Psychology	PSPS603010 (Compulsory Courses)	4		3	Depok	The goal of this course is to introduce the fundamental theories and ideas of social psychology. The premise of this course is that people find it challenging to live their lives in isolation from their social environments. Students in this course gain knowledge about how people think, feel, and act in social situations based on the findings of scientific studies. This course stresses the use of the scientific method to evaluate and develop conclusions and refers to scientific sources, both classical and contemporary, in an effort to comprehend human thoughts, feelings, and behavior. Students will learn social psychology basics, recognize instances of social psychology research, and use these principles to comprehend social phenomena through group discussions and interactive lectures in this course. Students should be able to assess the phenomena of psychological issues at the individual, group, organizational, and community levels in varied situations using relevant research and social psychology theory after completing this course. In particular, question-based learning, flipped classrooms, conversations, interactive lectures, and active learning techniques will be used in this course.
14	Psychology	Psychology	Undergraduate	Basic Psychological Intervention	PSPS603011 (Compulsory Courses)	3		3	Depok	Basic Psychological Intervention provides students with a general overview of behavior change aspects, as well as the underlying theory, basic skills needed in the implementation of non-clinical interventions. Students will be able to analyze the implementation of non-clinical interventions based on the principles of the psychological code of ethics. Classes will be conducted in Bahasa Indonesia through interactive lectures, discussions, case studies and group activities.
15	Psychology	Psychology	Undergraduate	Psychological Assessment	PSPS603012 (Compulsory Courses)	3		3	Depok	The history of psychological measurement development, their fundamentals, techniques, various types of psychological tests, and the ethics of using psychological measuring instruments based on HIMPSI (Indonesian Psychological Association) and APA (American Psychological Association) are all covered in this course. Students are given an interactive experience as part of the student-centered learning approach employed in this course. Students must actively seek out information on the lecture from the required textbooks as well as from a variety of other reference sources, both independently and in class. Students are required to categorize and note similarities, differences, and examples of various types of psychological test as well as analyze ethical violations of using psychological test kits that occur in Indonesia based on the HIMPSI and APA codes of ethics as part of group assignments during lecture activities.
16	Psychology	Psychology	Undergraduate	Research Method and Descriptive Statistics	PSPS603013 (Compulsory Courses)	3		3	Depok	Research Method and Descriptive Statistics (MPSD) course unifies research methodology and descriptive statistics into one subject. The standard teaching approach includes interactive lectures, data processing labs, and drafting research reports. contains information on how to do scientific research, including how to formulate a research question, collect data, process that data, and interpret the results, particularly for descriptive psychology research. The introduction and assessment of learning outcomes in this course will be conducted in Bahasa Indonesia

17	Psychology	Psychology	Undergraduate	Family Education Psychology	PSPS609016 (Elective Courses)	3		3	Depok	This course is designed to expose students to the application of educational psychology, with a particular emphasis on the role of the family, while also considering the environment of the school and society. Active learning methods, such as flipped classrooms, presentations, conversations, and interactive lectures will be presented in Bahasa Indonesia or English. Students will be able to explore the elements that can aid in the participation of families in the teaching and learning process of children at school after finishing this course. At the end of the course, students will be encouraged to create simple activities that include families (particularly parents) in the development of certain features by utilizing social media. (choose from one: physical, emotional & social development (including achievement motivation and social skills), Mathematics, Physical Education, Science and Social Sciences, Creative Arts & Music).
18	Psychology	Psychology	Undergraduate	Educational Psychology	PSPS604014 (Compulsory Courses)	4		4	Depok	After taking this course, students should be able to examine how psychological theories are used in the context of education and learning processes. The scope of educational psychology and the education system are covered in this course's readings. A variety of student characteristics, the taxonomy of learning, techniques for evaluating learning, classroom management, and the use of technology in learning are among the subjects covered in the discussion.
19	Psychology	Psychology	Undergraduate	Industrial and Organizational Psychology	PSPS604015 (Compulsory Courses)	4		4	Depok	The purpose of this course is to introduce students to concepts linked to organizational and/or workplace psychology. This course covers personal issues such as diversity in the workplace, personality and values, feelings and moods, attitudes and job satisfaction, as well as motivational theories and applications that are connected to organizational procedures like job analysis, hiring and selection, performance evaluation, and training. Basic subjects like leadership, consumer behavior, and human resources will also be covered in class, which will prepare them for future I/O related courses. Using Google Classroom and EMAS, this course combines e-learning strategies focused on microlearning and gamification (Buchem & Hamelmann, 2010; Deterding et al., 2011). The application of self-directed and active learning is shown by the comparison of online (70%) and offline (30%) encounters (Freeman et al., 2014). Students can apply the PIO idea to explain phenomena at the individual, group, and/or organizational levels in the workplace by the end of the semester. English is employed as a supplement to Indonesian as the primary language of instruction to aid in the learning process (books, journals, etc.).
20	Psychology	Psychology	Undergraduate	Group Intervention Method and Program Design	PSPS604016 (Compulsory Courses)	4		4	Depok	This course equips students with the competencies needed to design and carry out group interventions, particularly in conducting counseling and training sessions. Students will learn the fundamental theories of recognizing group needs, the stages of planning a group intervention, and the skills required for group intervention. After completing this course, students are expected to be able to design and implement appropriate group interventions based on the needs analysis. This course uses active learning, using methods such as interactive lectures, discussions, case-based learning, collaborative learning, experiential learning, and project learning. Instructions will be given in Bahasa Indonesia.
21	Psychology	Psychology	Undergraduate	Psychometrics	PSPS604017 (Compulsory Courses)	3		4	Depok	The Psychometric course imparts information and comprehension of the fundamental concepts in psychological measurement. The subject matter covered in the discussion relates to psychological measurement, good measuring test requirements, types of test, validity, reliability, item analysis, and norm development. After finishing this course, students should be able to evaluate the method of testing reliability, validity, item analysis, as well as the suitable method of establishing norms to test a specific psychological measuring instrument. This course's area of study covers the introductory lecture, reliability, validity, item analysis, and norms. Question-based learning, small group discussions, and practical are the teaching strategies employed in this course. The activities involve both individual and group assignments, and include developing norms as well as calculating and evaluating reliability, validity, and item analysis. Bahasa Indonesia is the language of teaching used in the classroom.
22	Psychology	Psychology	Undergraduate	Qualitative Research Method	PSPS604018 (Compulsory Courses)	3		4	Depok	The purpose of Qualitative Research Methods is to prepare students to conduct psychology-related research using qualitative research techniques that adhere to the psychology code of ethics. As a result, the product of this course consists of the findings of independent study that students in groups did. In general, this course covers a study of the paradigms of qualitative research, features of its validity, various qualitative research tools, and ethical considerations. The language of instruction for this course is Bahasa Indonesia.
23	Psychology	Psychology	Undergraduate	Leadership in Psychological Perspective	PSPS609022 (Elective Courses)	3		4	Depok	Every student has aspirations to be a leader, and the Leadership in Perspective course is designed with the knowledge that such qualities, styles, and abilities can be developed. In other words, this course is designed to aid students in developing crucial leadership skills in addition to understanding leadership theory and analyzing leadership practice.

24	Psychology	Psychology	Undergraduate	Mental Floss for Youth	PSPS609024 (Elective Courses)	3		4	Depok	The goal of this course is to give students the information and understanding of adolescent mental health as well as the technical skills necessary to develop community-based technology-based solutions to mental health issues. This course will provide students the chance to research adolescent mental health in Indonesia under diverse circumstances and settings, examine and discuss relevant topics, and advance transformational change in the adolescent mental health sector. This course will be taught via interactive lectures, group projects, and discussions.
25	Psychology	Psychology	Undergraduate	Abnormal Psychology	PSPS605019 (Compulsory Courses)	4		5	Depok	Throughout this course, students will gain knowledge and comprehension of prevalent psychological disorders and difficulties that affect both children and adults, as well as information about psychological disorders in both children and adults. Upon completion, students are also capable of evaluating and assessing abnormal behavior/illnesses in accordance with the diagnostic criteria of DSM V when confronted with children and adults who suffer from psychological disorders (A5, C4).
26	Psychology	Psychology	Undergraduate	Clinical Psychology	PSPS605020 (Compulsory Courses)	3		5	Depok	In this class students will explore current psychological theories to learn about the notions of mental health and psychological disorders, examinations, and interventions in clinical psychology. Students will also learn about and engage in discussions about several subfields of clinical psychology, including forensics, health psychology, neuropsychology, and child clinical psychology. To ensure that the students fully comprehend the topic, it is delivered through engaging lectures and group discussions. This course's language of instruction is Bahasa Indonesia.
27	Psychology	Psychology	Undergraduate	Group Intervention Method and Program Design	PSPS605021 (Compulsory Courses)	4		5	Depok	This course equips students with the competencies needed to design and carry out group interventions, particularly in conducting counseling and training sessions. Students will learn the fundamental theories of recognizing group needs, the stages of planning a group intervention, and the skills required for group intervention. After completing this course, students are expected to be able to design and implement appropriate group interventions based on the needs analysis. This course uses active learning, using methods such as interactive lectures, discussions, case-based learning, collaborative learning, experiential learning, and project learning. Instructions will be given in Bahasa Indonesia.
28	Psychology	Psychology	Undergraduate	Psychological Measurement Construction	PSPS605022 (Compulsory Courses)	4		5	Depok	This course is designed for students intending to study and carry out the steps to develop psychological tests or inventories in accordance with scientific rules that have met the requirements. The preparation of a psychological test begins with determining the construct, looking for the theory behind it, developing indicators, writing items, testing reliability, along with validity, analyzing items, and compiling norms. The process will end after students are able to curate reports on the results of the psychological test in accordance with the rules of scientific writing in the field of psychology.
33	Psychology	Psychology	Undergraduate	Human and Lives in Digital Era*	PSPS609042 (Elective Courses)	3		5	Depok	This course on Human and Lives in the Digital Age aims to educate students on a range of problems, difficulties, and idiosyncrasies of modern human life. After completing this course, students should be able to create thoughtful, original, and moral non-clinical treatments relating to contemporary human and life concerns using research methodologies and psychological theories. In particular, case-based learning, flipped classrooms, conversations, presentations, and interactive lectures are all active learning techniques used in this course. The main language of instruction for this course will be Bahasa Indonesia and English
34	Psychology	Psychology	Undergraduate	Three Semester Learning Rights - Rights to Study In or Outside the Study Program		20		6	Depok	MBKM
35	Psychology	Psychology	Undergraduate	Coaching, Mentoring, and Counselling	PSPS609057 (Elective Courses)	3		6	Depok	The goal of this course is to give students a foundational understanding of coaching, mentoring, and counseling (CMC), as well as basic and advanced CMC skills for helping clients within the business. Then, using technology as a tool, students gradually plan and implement CMC within the parameters of the organization. Using Google Classroom and EMAS, this course combines e-learning strategies focused on microlearning and gamification. A comparison of online (70%) and offline (30%) sessions highlights the use of self-directed and active learning to enhance learners' attitudes, abilities, and knowledge (Freeman et al., 2014). Although Indonesian is the primary language of instruction, English is also utilized occasionally to enhance the learning process (books, journals, etc.).
